WATCH FUNCTIONS

The crown has 3 positions:

- 1. Normal position (wearing position):** when the crown is positioned against the case, the crown ensures that the watch is water-resistant.
- 2. Correcting the date:** pull the crown out to position 2, turn the crown forwards or backwards, then push the crown back to position 1.
- 3. Time setting:** hours – minutes – seconds. Pull the crown out to position 3. The seconds hand will stop. Turn the crown forwards or backwards. Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal.

The end of battery life is indicated by the seconds hand making 4-second jumps. The watch will continue to function for several days, but the battery must be removed and replaced by an authorised OMEGA service agent as soon as possible.
